Passion

Fructital was founded in 1922 as a small supplier of natural essences for the confectionery industry.

Over the years it has grown and in the year 2000 it was purchased by Collino's family who decided to focus completely on the gelato business. The choice was motivated by the specific desire to maximize the concept of craftsmanship and to associate it with the quality standards that only a small company is able to guarantee.

Quality

We rely on high-quality ingredients and carefully selected raw materials in order to offer our customers only the best.

We personally select the raw materials, we roast, we refine and we work following step by step the different processing methods. Our aim is to keep the original taste and to guarantee freshness and authenticity. The assiduous research on ingredients has the purpose to improve the pursuit of natural products, an adjective which nowadays is of utmost importance and that means, for example, a limited use of food additives or preservatives.

Craftmanship

Our production systems are designed to defend and maximize the craftsmanship of the finished product, from the ovens for the roasting of nuts to the refining machines for creams, from the syrup cookers to the mixing powder plants. The machines are all designed for the product and not vice versa.

All the nuts are roasted internally with artisan care and transformed into paste with a special process of cold refining that brings out the best taste and texture.

Research

changing: in recent years we have increased the Research&Development area in order to create new products and to improve the production processes. We always offer our customers the opportunity to create exclusive products providing the expertise and the creativity of a team of well-established professionals.

We go on with investments to improve the plants and the production areas, in order to increase the efficiency of the service and of the delivery to the customers and to offer to the production workers a safe and pleasant working environment.

Bases for gelato

Milk gelato bases

High quality powder bases, designed to obtain an excellent artisanal gelato with a smooth and velvety texture. Fructital offers a wide choice of mixtures to be used in different dosages to satisfy the requirements of all artisan gelato makers.

| PO0115 | Base Latte 50 | н/с | 35 g/kg | 4 x 5 kg |

| | PO0908 | Cheesecake Più with cheese powder | 80-100 g/kg | 6 x 1,5 kg |

Flavouring Pastes

Fruit pastes

The use of a high percentage of first quality selected fruit and the accurate processing technique lead to the production of pastes that can be used as an effective alternative to the use of fresh fruit or simply as an addition to the fruit itself, providing the ice cream excellent quality, constant flavour and color.
